FM Tower 17

Active FM antenna in a high-gloss finish

Only select materials have been used for this active AM/FM antenna. The FM Tower 17 has also been elegantly finished using a UV high-gloss varnish to create a sophisticated product in a unique design. An adjustable amplifier enhances the excellent reception from nearby or distant transmitters. The antenna is suitable for FM or MW and possesses a powerful and adjustable amplifier with omni-directional reception – which means that its positioning in the living area is not critical.

Features

- ✓ Suitable for FM / AM
- ✓ Adjustable amplifier
- ✓ Omni-directional reception
- ✓ 24- carat gold-plated contacts
