Digital Flat 2.5

Active DVB-T antenna in a high-gloss finish

The Digital Flat 2.5 is an active high-performance DVB-T antenna. A low-noise amplifier enhances the excellent reception from nearby or distant transmitters. Selected materials are combined with a high-gloss UV finish to provide this high-quality product with a unique design. Prerequisites are a television set with integrated DVB-T tuner or an external settop box (DVB-T receiver). Connect the Digital Flat 2.5 to the antenna socket on your television set or set-top box. After you have completed a channel scan you will be able to receive digital television programmes. Package contents: Wall bracket and stand for flexible positioning, mounting material, coaxial antenna cable, AC adapter, removable amplifier for maximum flexibility and performance.
