## Oehlbach® XXL Sub Xtreme

Hifi Test 12/2011

A suitable, properly shielded subwoofer cable with high-quality connectors is just as important as the new subwoofer itself.

The brand new XXL Sub Xtreme from Oehlbach offers the best conditions. This cable is double shielded, has flexible fabric sheathing and is equipped with high-quality connectors that promise maximum stability and perfect signal transmission. Our test candidates give it more precision, a more dynamic sound in the root note and an enhanced low bass experience, so that you sometimes have the impression that another subwoofer is playing. In addition to its tonal advantages, the XXL Sub Xtreme also impresses in terms of practicality. Even after plugging in and unplugging the cable hundreds of times, the connectors and transition to the cable showed no

signs of fatigue or deficiency thanks to the high-quality components and the excellent workmanship of the high-end product.

### Conclusion

Our long-term testing has proven once again that the use of high-quality subwoofer cable is strongly recommended. With the XXL Sub Xtreme, Oehlbach offers a well-crafted and well-equipped cable that can achieve its full potential with the new subwoofer.
