

BLUETOOTH® TRANSMITTER / RECEIVER

BTR EVOLUTION 5.0

This Bluetooth transmitter / receiver gives the Bluetooth standard 5.0 completely new possibilities. Connect home entertainment hardware optically with Toslink cable or analog via stereo RCA and send or send pure sound wirelessly from or to the BTR Evolution 5.0, the new multitool for your sound enjoyment. As a 2-in-1 adapter, it not only transmits but also receives - both with the Bluetooth® 5.0 standard and backwards compatible. Switching between send and receive mode is possible with a toggle switch. Pair the Oehlbach BTR Evolution 5.0 with two devices and enjoy double CD quality with aptX HD. With low latency function and a delay of less than 40 milliseconds you will not notice anything of the wireless transmission and can simply enjoy music and other sounds to the full extent as with an Oehlbach cable connection. This sounds good at home and with its elegant, high-quality design in two colours, it looks good in any home.
