

DIGITAL AUDIO/VIDEO CABLE COMPONENT VI/D

High-quality analogue video-component cable (YUV) with DVI-I plugs. The cable is characterized by the particularly well-made cinch plugs and the very complex multiple shielding. The 24-carat gold-plated plug contacts and the entire cable's high resistance to wear mean that outstandingly reliable contacts and durability are guaranteed. The inner conductors made from highly pure oxygen-free copper in conjunction with the effective shielding ensure that signals are transmitted without loss and without annoying interference. This Oehlbach cable is typically employed to transmit analogue images from a source device possessing a component output (YUV) through the three cinch sockets and a target device (e.g. a projector) with DVI-I input. Please ensure here that your target device is able to handle the component signal at the DVI-I socket as this cabling is not DVI-standard-compliant!

MULTIPLE SHIELDING **OFC** **24ct GOLD** **FULL METAL** **75Ω** **30 YEAR GUARANTEE**

DVI-I 3xCinch

SIGNAL DIRECTION
 Bi-Directional

Features	30 years warranty, 24kt gold plated contacts
Inner conductor material	OFC - oxygen-free copper
cable geometry	Round
cable material	Robust plastic sheathing, plastic
Shielding	Multiple shielding
Shielding construction	1 x aluminium foil + 1 x copper braiding
