# HIGH-SPEED HDMI® CABLE WITH ETHERNET

## HIGHSPEED SHAPE XT-SL

The tried and tested concept of the flat, angled HDMI connector - in premium 4-star quality for the very first time. The Highspeed Shape XT SL combines maximum flexibility with maximum quality. Its silver-plated, oxygen-free copper inner conductor and solid metal connectors with 24-carat gold-plated contacts ensure a high quality and flawless transmission of digital signals at all times. The 4-star, triple-shielded cable supports resolutions up to Ultra HD and its HDMI Ethernet channel offers an additional data channel for connecting Internet-enabled AV components. Furthermore, the cable is also equipped with two different HDMI connectors, which are angled by 40°. This makes the cable particularly suitable for side HDMI ports on LCD TVs. Multiple connectors can even be positioned one above the other in a „piggyback“ configuration.
