PHASE DETECTOR PHASER

MSRP (19%): 79.99

Unit for an easy and accurate detection of in-phase polarity of all homecinema-, audio- and video devices. Connecting all devices in-phase to a high-performance powersocket (like for example the Oehlbach Powersockets or Powerstation) avoids ground-loop circuits and preserves perfect acoustic imaging and interference-free visual display. The tester is easy to operate and is run by reliable, solid technology. The cabinet comes in a solid, high-grade aluminium finish aluminium case. The Phaser is powered by a standard 9 V batterie (included in delivery). (Restricted function on components with inductive mains switch.)

packaging size	80mm / 260mm / 165mm
Weight (net)	431 g
Colour	Silver
Housing material	Ultra thin single conductors
