

# HIGH-QUALITY MULTI-SOCKET OUTLET

## POWERSOCKET 907

**MSRP (19%): 249.00**

The Oehlbach Powersocket 907 is a multiple socket that has been made to very high standards and that will satisfy even the demands that are made at the top end of the home-audio and home-video segment. The multiple socket possesses a total of eight individual sockets – four digital (filtered) and four analogue (unfiltered) plug sockets. Also, two separate plug-socket groups consisting of two filtered and unfiltered plug sockets each may be switched individually. The Powersocket 907 also possesses two USB sockets for charging multimedia equipment, e.g. MP3 players and tablet PCs. The two USB sockets are also controlled by the mains switch. The Powersocket 907 possesses phase marks at the individual plug sockets and the correct connections are indicated by a red control lamp in order to ensure that the equipment's phases are properly connected. This is the only way to effectively prevent potential-equalization currents from interfering with audio and image data. Very high-quality inner cabling with a cross-section of 2.1 mm<sup>2</sup> and made from highly pure oxygen-free copper and gold-plated solid brass rails always guarantees stable power supplies – even for components with high power requirements.

Power cord supplied with the delivery.

packaging size	100mm / 700mm / 185mm
cable cross section	2.1 mm <sup>2</sup>
Colour	Anthracite
Housing material	2 plug-socket groups (filtered / unfiltered) may be switched individually
Weight (net)	2650 g
Features	24kt gold plated contacts , Reliable contact, 2 USB sockets for charging devices
Inner conductor material	OFC - oxygen-free copper
