# JITTER CLEANER AND USB POWER FILTER

## PURE CLOCK

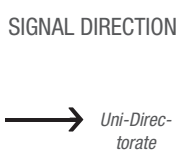

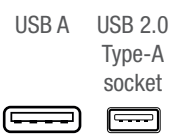

**MSRP (19%): 49.99**

High-resolution digital audio signals in particular require both a precise and stable clock as well as a clean and interference-free 5V power supply as the basis for high-quality D/A conversion. In addition, the USB interfaces of computers and notebooks are susceptible to electromagnetic interference and signal noise. The Oehlbach PureClock almost completely eliminates the clock jitter and high-frequency interference signals known as „jitter“ and guarantees perfect synchronization between USB interface and converter.

**24ct GOLD**    **100% CONTACT**

packaging size	55mm / 235mm / 160mm
Weight (net)	124 g
Colour	Anthracite
Features	100% contact reliability, 24kt gold plated contacts
