

LOCKING CAP FOR HDMI CON- NECTIONS

PURE LOCK!

MSRP (19%): 14.99

HDMI® connections have the disadvantage that their plugs are not secured against them slipping out. The plugs themselves do not provide automatic locking and the plug's position in the socket is not secure so that any tension applied accidentally may in the worst case result in the signal being interrupted. The patented Pure LOCK! system is a universal retainer that may be used on all HDMI® plugs and cables available on the market. The Pure Lock! retainer is pulled over the HDMI® plug, the screw located above the HDMI® socket is removed and then screwed instead into the Pure Lock! retainer. Signal interruptions caused by plugs slipping out are now a thing of the past.

packaging size	30mm / 170mm / 85mm
Colour	Transparent
Features	German Technology
Weight (net)	30 g
content	4 pieces
Housing material	More than five Inputs
