INDOOR ANTENNA FOR DVB-T2 RAZOR FLAT

MSRP (19%): 99.00

Oehlbach XXL® Razor Flat - DVB-T2 HD in perfection

The Oehlbach XXL® Razor Flat DVB-T2 HD indoor antenna is so compact that it is almost invisible in the living room: The antenna itself is only a few millimeters thin and can therefore be mounted extremely inconspicuously. Thanks to the patented Oehlbach reception technology, it simultaneously offers outstanding reception values even under extremely demanding conditions - for example, in areas with a generally weak DVB-T signal, when operating in the basement or in interior rooms.

More DVB-T2 HD is impossible: perfect reception with XXL Razor Flat
 Oehlbach stands for absolute top quality in cables and electronic products. The XXL® Razor Flat once again occupies a very special place in this premium portfolio as a product in the 5-star category: Thanks to the patented reception technology developed directly by Oehlbach in Pulheim near Cologne, the DVB-T2 HD indoor antenna still offers the best possible result even under the most difficult conditions. If you don't want to compromise on DVB-T(2 HD) reception, the XXL® Razor Flat is the perfect choice.

Perfectly prepared for the DVB-T switchover

In the course of 2017, the broadcasting of the current „normal“ DVB-T signal will be discontinued. The free frequencies are taken over by the successor standard DVB-T2 HD. For the first time, Full HD transmissions (up to 1080p) are now possible in terrestrial television. The reception of this high-resolution TV standard via indoor aerial is a great advance, but in some areas - for example, the TV receiver - it also means that a new purchase is necessary. But when buying an antenna you are on the safe side: The Oehlbach XXL Razor Flat can do both: DVB-T and DVB-T2 HD.

Flexible and unobtrusive mounting

The Oehlbach XXL® Razor Flat Antenna is only a few millimeters thin and very light. Two small nails are sufficient for attachment (the antenna has two pre-cut holes in the sheath especially for this purpose). If even this is too complicated for you, you can simply use double-sided adhesive tape instead - in most cases this is already enough. The 3.6 meter long cable offers additional flexibility in installation. If you hide the XXL Razor Flat directly behind the TV, you can also provide it with the appropriate power connection via USB.

75Ω **FULLHD** **24ct GOLD**
DVB-T2 HD **DVB T2**

DVB-T2 HD is an initiative of ARD, Medienanstalten, Mediengruppe RTL Deutschland, ProSiebenSat.1 Media SE, VPRT and ZDF. We don't use their logo, we just mention the name „DVB-T2 HD“ so customers know that our device is compatible. DVB® and
