Oehlbach® Twin Mix Two speaker cable
Best signal quality

av-magazin 12/2011

Tip: Twin Mix Two speaker cable

For this test, we used the Twin Mix Two speaker cable from cable specialists Oehlbach. When it comes to optimal transmission of true-to-audio quality, expensive braided copper wiring guarantees the best signal quality. High, medium and low tones sound powerful and brilliant even over long cable runs with the 12 square millimetres cross sectional area.

Brand: Oehlbach

Model: Twin Mix Two (non-assembled sold by the metre)

Features: 2 x 6 mm², 2 x 3 backbones, silver-plated copper, full rubber sheath

Lengths: Sold by the metre
